MEDICOVICH & NORILE

UNITED STATES LAND OFFICE Notice is hereby given that John H. Slaughter, whose postoffice address is Bisbee, Cochise county, Arizona, has made application to select under the Act of June 4, 1897, (30 Stat., 36) the following described

tracts:

First—40 acres, unsurveyed, on west slope
Stein's Peak, in Guadalupe canyon, Cochise
county Arizona, in what will be T. 24-S., R.
32-E., G. and S. R. B. and M. The initial point
marking center of tract is a waste pipe in
center of small rock and cement dam in a
small side canyon leading northwest into
Guadalupe canyon, from which initial point
monument No. 73 of boundary between U. S.
and Mexico bears S. 80 deg. 26 min., W. 3786
feet.

and Mexico bears S. 80 deg. 26 min., W. 3786 feet.

Second—40 acres, unsurveyed, on west slope Stein's Peak, Cochise county, Arizona, in what will be T. 23-S., R. 32-E. G. and S. R. B. and M. The initial point marking center of tract is a cross about 8 in. long between letters Schiseled on a cement rock, situate on the break of flat above bottom of Sycamore creek, about one mile up creek from house known as "Old Smith Ranche." From said initial point white oak tree 2 ft. diameter bears N. 26 deg. 44 min., E. 3 ft., scribed "S. S. ranch In. Pt. B. T." N. E. cor. ruins adobe house 12x10 ft. bears S. 79 deg. 10 min. W. 391 ft. White oak tree 12 in. diameter scribed "B. T." bears N. 58 deg. 20 min., E. 13½ ft. White oak tree 14 in. diameter, center stem. scribed "B. T." bears S. 18 deg. 50 min., E. 125 ft. Three conical hills bear as follows: S. 68 deg. E. about ¼ mile, S. 43 deg. 45 min., W. about ¼ mile, S. 58 deg. 30 min. W. about one mile. Locating monument of rocks 3½ ft. base, 2½ ft. high on summit hill overlooking San Bernardino valley bears S. 36 deg. 44 min., W. 3877 ft. From said locating monument N. 3877 ft. From said locating monument N. 3877 ft. From said locating monument No. 77 of boundary between U. S. and Mexico bears S. 57 deg. 8 min., W. approximately 12 miles.

Within the next thirty days from the date of the first publication of this notice protests or contests against the selection on the ground that the land described, or any portion thereof, is more valuable for its minerals than agricultural purposes, will be re-

tion thereof, is more valuable for its minerals than agricultural purposes, will be received and noted for report to the Commissioner of the General Land Office.

HARRY H. McMann. First publication Sept. 12, 1900.

Observations Made at the Naples Medical College.

Means Suggested for the Prevention of Spread of the Disease-Question of Contagion in Public Places.

Some very novel suggestions in regard to consumption were made at the medical congress which met the other day at Naples. The physicians were unanimously of opinion that the various governments ought to take some steps to ward off the evil, says the New York Herald, and Dr. Callivokos, of Athens, even maintained that no one should be employed in a public or private capacity who was not absolutely free from the disease. and that any persons who are now employed and who have in their systems the germs of consumption should at once be dismissed. The exact physical condition of each employe, he pointed out, could be readily ascertained by making a thorough medical examination, which

should be compulsory. Dr. Aussel, of Lille, said that it would be well if every house owner were obliged, before he rented his property, to make a full statement, not only in regard to its sanitary condition, but also in regard to all cases of infectious diseases which may have occurred in it as well as the number of times that it was necessary to disinfect it. He also maintained that the laws of hygiene should be clearly taught both to children and to sol-

Attention was then called to the fact that in several government offices in Italy consumptive employes are now assigned to work which does not bring them into contact with the public, and that the women employed in the national cigar factories are now regularly examined by government physicians, with the result that those among them who are found to be consumptives are discharged, but receive a small pension for life. The question of contagion on railroad carriages was also discussed, and ar. Sanarelli said that the evil would doubtless be much lessened if the companies would only substitute linoleum for the customary carpets in the carriages, and if, instead of the velvet and other heavy stuffs on the seats and cushions, they would use some light material, which could be easily washed. At present, he pointed out, tuberculosis is not officially classified among the infectious diseases, and, therefore, railroad companies are not bound to disinfect the carriages in which consumptives have traveled.

of such carriages, it would be very difficult to disinfect them thoroughly. Finally, Dr. Saranelli maintained that on every railroad there should be special carriages for consumptives, but he did not explain now consumptive passengers could be cajoled or coerced into occupying these carriages during their journeys. That they would occupy them of their own volition, and thus publicly exploit themselves as the victims of a contagious disease, is not likely.

In any case, on account of the tapes-

try, curtains, velvet and decorations

"The Influence of Climate on the Evolution of Consumption" was the title of a paper by Dr. Sannelongue, in which he described a curious experiment recently made by him. Selecting 150 healthy guinea pigs, he inoculated them on the same day with the culture of Koch's bacillus of consumption, and then he divided them into three equal lots, one of which he sent to the seacoast, another to the mountainous region of Haute-Loire, while the third lot he placed in the cellar of his laboratory. In due time he examined the animals and found that those which he had placed in the cellar were the strongest and healthiest. He accounts for this strange result on the ground that there was an equal temperature in the cellar. He adds, however, that what may benefit guinea pigs may prove prejudicial to human beings, and thus tacitly admits that the air of the seashore or mountains is likely to prove more beneficial to consumptives then that

of a cellar. Lord Randolph Churchill. When Winston Churchill gets home from Africa he intends to make it his first business to go over his father's papers and write his life. He will be able to show, among other things, that some cruel stories about Lord Randolph Churchill's last sad days were entirely without foundation. Lord Randolph broke down under general paralysis, and the explanation of his malady is perfectly simple. It originsted from the mental shock he suf-

Punetilious. "And now, madam," said the census

enumerator, "as to your age."
"Ah, yes," she answered, as she glanced at the blank; "but you'll have to be more explicit."

"Your age at your last birthday is what is mentioned." "You will have to specify the time of day upon which you want the calculation based, also whether you wish to know my age in seconds or merely

in hours or minutes." The enumerator began to look worried, and began to suspect for the many-th time that day that working for the government is not the sinecure

it has been pictured. "You know," she proceeded sweetly, "that a birthday is something that occurs only once in a lifetime. If you had said birthday anniversary it would be different. But you didn't say it, and I must shut the door now and get back to my sewing."-Washington Star.
